

Certified ScrumMaster

Course Overview

Start Date	24th April 2018	Duration	2 Days
Location	Dublin	Course Code	SS17-115

Programme Overview

This two day programme, through a mixture of class room study, exercises, pair discussions and real-world trainer experiences, gives participants the knowledge on how to facilitate and coach a Scrum project.

Techniques used to investigate these practices include Vision Creation, the use of the Product Backlog, Backlog Formatting Techniques, Story Point Estimation, and how to use this to formulate a release plan.

Course Objectives

Those attending the course will learn how to:

- Assume the responsibilities of a ScrumMaster.
- Remove the barriers between development and the customer so that the customer/Product Owner directly drives development.
- Improve employee and customer satisfaction.
- Improve accuracy of estimation and planning.
- Improve the engineering practices and tools so each increment of functionality is potentially shippable

Who should attend

Team leaders working in an agile environment.

Certification

Scrum Alliance Certification

Other course details

The course fee includes Scrum Alliance Certification
